## Summary

I am an enthusiastic software engineer with a history in the IT and technical support fields. Having worked in a myriad of positions as the pivot between engineers and customers it has helped me build a holistic perspective on project-based environments. I love to learn and challenge myself.

---

## Technical Toolset

Linux (Ubuntu), Mac, Windows, Javascript, Python, MongoDB, Django, SQL (PostgreSQL), Node.js, Express, React, Bootstrap, HTML, CSS/SASS, Markup, jQuery, Wireframes, User Stories, AJAX, Axios, bcrypt, Cors, Socket.io, Agile, Scrum

---

## Work Experience

### Software Engineering Immersive Fellow - General Assembly

April 2020 - June 2020

480+ hours of coursework; individual and team based

Four full-stack projects with current technologies in software development:

- **Character Creation Tool SPA + API** - Solo full-stack application project highlighting a React/Javascript front-end with a custom build Django/Python back-end. This allows you to log in, create a character, view all of your characters and edit their health attributes. Serving as a foundation for a future monster battling platform.
- **Project Stardust Chat SPA + API** - Group full-stack application project highlighting a React/Javascript front-end w/ Express/Javascript API back-end w/ sockets.io and pair programming. This includes an auth section, chat section, and updatable user profile.
- **Pet Sharing SPA +API** - Solo full-stack application project w/ Javascript, Handlebars, jQuery, HTML/SASS front-end and Express API back-end. This has an auth section, then you can add and share your pets. You could also see all pets but only edit your own. It was my first project doing both the front and back end programming.
- **Tic-Tac-Toe SPA** - Solo front-end project creating a game board and logic, creating a SPA, and integrating with an existing API. This was my first project utilizing Javascript, HTML, jQuery, SASS.

### IT, Technical, Product and Desktop Support
