

Colin R. Brine

Technical Support Engineer

Email: brinec@gmail.com - **Location:** Ayer, Massachusetts

LinkedIn: linkedin.com/in/brinec - **Portfolio:** brinecr.github.io - **GitHub:** github.com/brinecr

Summary

Technical Support Engineer working across e-commerce support, POS/payment hardware, partner integrations, and data analysis. Investigate code issues, contribute fixes, and coordinate payment-provider integrations and token migrations. Develop reusable utilities with AI assistance and help customers and teammates through remote troubleshooting, clear documentation, and training.

Technical Toolset

APIs and data: REST APIs, Postman, MySQL/SQL queries, data analysis.

Development workflow: JavaScript, Node.js, VS Code, macOS command line, repository changes, AI-assisted development and troubleshooting.

Technical support: POS/payment hardware, printers, remote diagnostics, payment-provider coordination, technical documentation and peer training.

Additional familiarity: React, Python. Earlier coursework (2020): Express, Django.

Work Experience

Commerce7 - Remote

April 2022 - Present

Technical Support Engineer

September 2026 - Present

Infrastructure Support Engineer

August 2023 - September 2026

Technical Support Engineer

April 2022 - August 2023

Promoted internally in August 2023. The September 2026 title change followed company-wide career and team title alignment.

Current responsibilities and contributions at Commerce7

- Serve as a primary technical escalation resource for supported POS/payment terminals and printers, troubleshooting device, connectivity and setup issues through remote sessions and video calls.
- Coordinate payment-provider integrations and token migrations between businesses, gateway partners and internal teams; track progress, identify failures and engage technical owners to resolve them.
- Investigate code-level product issues, contribute fixes, and submit repository changes within the team's development workflow.
- Use REST API requests and targeted data queries to investigate complex technical escalations and communicate findings across teams.
- Develop and use reusable MySQL query tools with JavaScript and Node.js using AI assistance; share code with teammates for review ahead of a broader rollout.
- Develop remote collaboration tools and workflows aimed at reducing unnecessary meetings, improving communication, and making problem-solving more efficient and enjoyable.
- Work with documentation and education teams to keep setup and troubleshooting guidance accurate. Automated the collection of system documentation to support existing guides and training.
- Taught teammates technical workflows and troubleshooting approaches, explaining the reasoning behind them; helped record hardware training videos.

Technical Customer Support Guru - VineSpring - Remote

September 2020 - March 2022

- Investigated escalated product and payment issues, coordinating development follow-up through Zendesk and Zenhub.
- Worked with MongoDB and AWS-hosted databases; ran AWS Lambda scripts to synchronize data, primarily with Square.

Transitioned to Commerce7 following its acquisition of VineSpring.

Software Engineering Immersive Fellow - General Assembly

April - June 2020

Completed 480+ hours of individual and team coursework; certificate issued July 2020. Selected coursework projects:

- Character Creation Tool: built a React/JavaScript client and Django/Python API for authenticated character creation, viewing, and attribute updates.
- Project Stardust: collaborated on a React and Express chat application with Socket.io, authentication, and editable user profiles.

Desktop Support Specialist - Optos assignment

September 2019 - March 2020

Through The Davis Companies - Marlborough, MA

- Led and trained approximately 20 temporary agents supporting a Windows 7 to Windows 10 migration involving roughly 12,000 computers.
- Wrote operating procedures and training documentation from engineering guidance; used SQL to verify database backups before device migration.

Support Engineer Level 1 - Vision Government Solutions - Hudson, MA

2019

- Supported property-appraisal software and Oracle/SQL database environments, including running SQL scripts and remotely troubleshooting customer systems.

Business Support Specialist - Comcast Business - Hudson, NH

2017 - 2019

- Supported small-business internet, phone, video, and billing services; handled escalations and documented troubleshooting and service changes.

AR Retention Specialist - Tyco SimplexGrinnell - Westminister, MA

2016 - 2017

Customer support and accounts-receivable work in a temporary assignment.

Customer Service Representative - Destination Weddings Travel Group

2016

Wayland, MA

Product and Technical Support Specialist II - Bose Corporation

November 2013 - March 2016

Westborough, MA

- Supported consumer audio and wireless products, used remote access for home-network troubleshooting, and participated in the E-Solutions mentorship program.

Earlier Bose assignment through Randstad: Product and Technical Support Specialist | October 2012 - November 2013

Earlier Experience

2007 - 2012

Keefe Commissary Network, Commissary Representative; Loomis, Armed Service Technician/Driver; Archer's Mobil, Overnight Store Clerk.

Education & Awards

General Assembly - AI for Workplace Productivity | February 2025
